

AI FULLY AUTOMATED COOKING ROBOT

Product Introduction Promotion - Overview

CORE TECHNOLOGY: OVERWHELMING SPECS & AUTOMATION

- **High Speed & Large Capacity**

Complete up to 7kg cooking in just 3~5 minutes.

- **Multi-Operation**

Possible to simultaneous operate 3~5 units with a maximum of 16 staff.

- **Fully Automated Loop**

From cooking to plating, and even cleaning, all processes are automatically completed according to simulation.

Productivity and efficiency are raised to an unprecedented dimension.

*Cooking conditions will be optimized per menu.

OUTRO : VISION

From the dynamism of Chinese cuisine to delicate Japanese cuisine, modern Western cuisine, and to every gastronomy across the world.

INTRO: CHALLENGES & INNOVATION

An aging workforce, critical labor shortages, and skyrocketing operating costs. We will break through these challenges facing the food industry with the power of technology. That is the AI Fully Automated Cooking Robot "YaoGun-PRO". Despite its compact design, it features overwhelming processing power and achieves complete reproduction of professional techniques. We will fundamentally overhaul conventional kitchen wisdom.

GLOBAL & FUTURE: THE FUTURE OF FOOD CONNECTED BY THE CLOUD

The true nature of "YaoGun-PRO" is more than a mere labor-saving device. This is a "Food Platform" connected to the world.

Through the cloud, recipes developed by top-class chefs worldwide are remotely updated in real time. Anytime, anywhere, wherever operates it, "Exquisite Taste" without the slightest deviation is reproduced.

Furthermore, we flexibly respond to the development of healthy menus and wellness recipes incorporating data marketing, health consciousness, and environmental considerations. Through standardizing cooking and innovation, we create new value in food culture.

"YaoGun-PRO" will redefine the kitchens of the future and food culture itself. Let's start the next era of food business from right here.
