

Intellectual Property (Patents, Utility Models & Practical New Designs)

Nippon Mirai Co., Ltd. is advancing the exclusive ownership of AI-powered food preparation technology.

Our intellectual property portfolio serves as proof of our technological superiority and provides the foundation for delivering unique value to our customers on an ongoing basis.

Strong Intellectual Property Foundation

We have built a robust intellectual property portfolio in key technical areas related to AI-powered cooking, earning high evaluations from experts in each field.

Technical Superiority and Uniqueness

- **Thorough technical evaluation:** From analysis of cooking data to robotics control, our cutting-edge technology portfolio is highly versatile and comprehensive.
- **Uniqueness of design and functionality:** Based on our proprietary design and usability, we protect products that deliver both aesthetic appeal and superior usability.
- **On-site proven results:** Our 20 utility model applications are based on fine-tuned improvements made on actual kitchen sites, focusing on “ease of use” and “efficiency.”

Certificate Gallery

We introduce some of the certificates we have obtained in Japan. These licenses represent the trust and innovative capabilities of Nippon Mirai Co., Ltd.
